Drawing upon a comprehensive suite of web technologies, I am a Front End Developer dedicated to creating stellar, high-performing web interfaces. My commitment extends to the design of advanced tools that both optimise website performance and enhance developer productivity.

HTML, CSS, SCSS, Tailwind, Bootstrap, Radix, Javascript, Typescript, JQuery, Petite Vue, Vue 3, Nuxt 3, Pinia, VB.Net, Supabase, Git, Webpack, Vite.

Bluesky Interactive / Front End Developer (Builds)

August 2022 - Present

Promoted to a build developer role in August 2022, I specialised in crafting websites for car dealerships.

- Enhanced boilerplate code for speedy development, fewer bugs and added features.
- Addressed SEO issues for optimised website performance.
- Consistently ensured high-quality website deliverables.
- Participated in pull requests and provided guidance to fellow developers

Bluesky Interactive / Front End Developer (Bespoke)

October 2021 - July 2022

Promoted to a bespoke developer role in October 2021, I undertook advanced, client-centric projects.

- Integrated franchises and updated locations.
- Altered financial data per requirements.
- Designed custom pages tailored to client needs.
- Implemented third-party scripts for enhanced interactivity.
- Delved into SEO with a focus on page speed optimization.

Bluesky Interactive / Front End Developer (Maintenance)

April 2021 - September 2021

As a junior developer at a dynamic agency, I gained hands-on experience in various facets of web development.

- Troubleshoot and resolve user experience issues.
- Updated and managed car pages.
- Enhanced content for optimal relevancy.
- Managed website maintenance across multiple platforms.

University of York / Audio & Music Technology MSc

September 2019 - September 2020

University of Derby / Music Production & Technology BSc

September 2016 - June 2019
